

EIEIO Wind Hill Vineyard Pinot Noir 2012 Technical Information

Wind Hill, planted in 1974, is the oldest vineyard that EIEIO & Company currently sources fruit from. Located approximately five miles northwest of Banks, Oregon this is the northern most vineyard in the Willamette Valley. As such, it is a cooler and later ripening site. A gentle south-facing slope helps to ripen the old-vines and produces an elegant, cellar-worthy wine. Wind Hill is predominately composed of volcanic soils known locally as Laurelwood and great plant material made of old, self-rooted Pommard clones. These are all essential elements for producing great Pinot Noir. Since 2001 EIEIO has had access to fruit from this site, however no single vineyard designation was cited until 2004; prior to then the wine was bottled under the Cuvee I label.

Fruit Source:	Stermer Vineyard
American Viticultural Area:	Willamette Valley
Sub AVA:	Yamhill Carlton
Soil Type:	Laurelwood
Planted:	1974 - 1988
Exposure:	South - Southeast
Elevation:	400 -900 feet
Clonal Selection:	Pommard
Harvest Date:	October 18th
Yield – TPA/YPV	2.2 TPA
Fermentation:	Native primary and secondary
Barrels:	20% new French oak
Production:	88 cases of 750 ml bottles

Laboratory Results:
titratable acidity 5.8 g/L
pH 3.67
volatile acidity(acetic) 0.63 g/L
ethanol at 60F 13.75 % vol
